Branches and Industries

Gates that open for PERFECTION,
and close for PROTECTION

version 01-2022

Family Business

from left ro right: Brigitte, Lisa and Ewald Holler

Our customers always come first. We believe in subject matter expertise, in the power of teamwork and collaboration. Only satisfied customers guarantee our business success and our jobs in the long run.

Dear interested readers and customers,

Established in 1992, we have been manufacturing high-quality aluminium gates and fences at our Leitring plant in Austria for 30 years.

Our guiding principle is teamwork. We are convinced that a close cooperation with our customers is the cornerstone of good customer relationship and satisfaction. Teamwork is like a well-oiled machine with all departments interlocking to make sure it runs smoothly and efficiently. Our top priority is to maintain and promote this spirit of collaboration.

We accompany every project from consulting, planning and technical clarification to shipping, and are on hand even after your project is completed to provide comprehensive support and service.

We hope that this catalogue provides you a compact overview of our extensive product portfolio and the manifold areas of application. All our solutions, from industrial to residential gates, combine high quality of materials and excellent workmanship.

We hope you enjoy browsing through our catalogue. Feel free to contact us and we will be more than happy to assist.

Kind regards,

The Holler family and entire team of Holler Tore

Sustainability

Reasonable and prudent use of energy, raw materials and production methods has always played a central role in our company.

Our today´s decisions shape our tomorrow´s world.

We process high-quality, durable materials by applying environmentally friendly and state-of-the-art technologies. Just another reason why our product lines HOLLER PRO, HOLLER HOME, and HOLLER DIY excel through highest quality and a very long lifetime. By adhering to these principles, we take responsibility for present and future generations.

Another key ambition is to promote actions that support the compatibility of work and family. Our new company restaurant and kindergarten make a significant contribution to this goal by supporting everyday family life and improving and encouraging the work-life balance of our employees.

Our 7 principles of sustainability and social responsibility

1. Photovoltaic systems

To contribute to a greener environment, our production processes take advantage of the powerful photovoltaic system installed on the roof of the production halls which converts the radiation of the sun into usable energy.

2. Façade greening

Façade greening with vertical green walls serves as natural insulation and protects our production halls from heating up in summer and reduces heating costs in winter.

3. Busy bees

Façade greening as “natural air conditioning” is a valuable habitat and an important source of food for animals such as butterflies, birds, and especially our amazing bees. We are committed to sustainability and the preservation of biodiversity and support local farming by creating additional green spaces.

4. Electric vehicles

The electric vehicles in our fleet encourage the establishment of a quiet, efficient, and clean electric mobility. Thanks to their environmentally friendly drive systems, electric motors are an innovative and efficient alternative to conventional combustion engines.

5. Wastewater-free powder coat finish

Our electrostatic powder coating plant is the largest in Austria and one of the most environmentally friendly and efficient systems for surface treatment worldwide. We rely on a wastewater-free process water and sink treatment that does not compromise the environment.

6. Waste heat utilisation and organic district heating

Our production halls are heated both by waste heat generated during the thermal processes in production and by climate-neutral district heating supplied by the nearby biomass heating plant.

7. Company childcare facilities

Thanks to our company kindergarten parents need less time to drop off or pick up their children. Opening hours of the childcare facilities are tailored to the needs of employees and thus reconciled with parents’ work schedules. We believe in the guiding principle:
Family well-being is the heart of global well-being.

Your Benefits

Single source supplier

The vertical range of production comprises the entire development, planning, and production. Also the powder coating is carried out in our factory. Each product that leaves our company is carefully checked and tested prior to delivery.

Unique and custom-made products

The profiles, developed specifically for our gates and fences, deliver customised and creative solutions for a wide range of applications. We exclusively use the highest quality materials to manufacture our products. As a result, all products are made with genuine and exceptional craftsmanship, and maximum precision.

Quality

Aluminium, corten steel, glass and stainless steel are only some of the materials that we use to produce our gates and fences. All products of the series HOLLER PRO and HOLLER HOME are provided with a high-quality powder coat finish. Maximum weather resistance, easy care, and scratch-resistant surfaces guarantee beauty and quality for many years.

Traditional engineering skills and innovation

Our unique aluminium, welding, screwing and clip&glue systems are highly reliable and guarantee a maximum level of quality. All solutions are manufactured state-of-the-art and robot-assisted in one of the most modern sliding gate factories in Europe, covering a surface of approximately 25,000 m².

Teamwork and social responsibility

Teamwork is the decisive factor in the production and distribution of our products. Each component passes through various departments and is carefully checked and revised at each production step by our highly qualified employees. Our teams in sales and shipping are committed to smooth and customer-oriented work-flows in order processing.

Certification and Awards

Our products meet strict quality standards and comply with the requirements of ISO 9001, EN 1090 and EN 13241-1. All sliding gates, swing gates, folding gates and barriers bear the TÜV (Technical Inspection Association) quality seal.
Holler Tore GmbH has developed into a lead company of the Austrian economy.

International support and service

We work together with numerous companies and organizations from the public and non-profit sector in more than 30 countries all over the world.
Our international sales network allows us to react quickly, efficiently and with high flexibility to the requirements and needs of our customers.
We are on hand after project completion to provide comprehensive customer support and service.

Our Products

Our products are manufactured in our factory which covers a surface of approximately 25,000 m2. The vertical range of production at the Leitring production site comprises the entire research and development, planning, and production. Our R&D team is engaged in the continuous development, testing and implementation of new manufacturing processes and cutting-edge technologies which always keep us one step ahead of our competition.

Responding to the demands of the global market, our systems are sold through three different product lines.

HOLLER
TORE - ZÄUNE - ANTRIEBE

Manufacturer

HOLLER PRO

Systems for the industry

This product line is characterized by power and strength as well as stability and durability. These systems are specifically and primarily designed for use in industrial and commercial areas, combining strength and reliability with aesthetic sensibility. The gates and fences of this product line are fully customisable, and therefore unique in design and construction.

HOLLER HOME

Systems for the private sector

Our product line for the private sector convinces with maximum flexibility and great variety. The stylish gates and fences are tailored to the requirements of private customers, and guarantee privacy and protection in combination with a high degree of architectural aesthetics.

HOLLER DIY

Do-It-Yourself systems

Our modular Do-It-Yourself systems are based on standardised components that offer innumerable design possibilities and can easily be adapted to existing situations. Pre-drilled holes and the provided fastening material facilitate assembly. No special tools are required.

Our Products

HOLLER PRO

HOLLER PRO Sliding Gate Classic

Width: max. 25,000 mm, cantilever
Height: max. 2,500 mm
Special constructions up to a height of 5,000 mm

HOLLER PRO Sliding Gate ECO

Width: max. 10,000 mm, cantilever
Height: max. 2,500 mm

HOLLER PRO Sliding Gate floor-guided

Width: max. 50,000 mm
Height: max. 2,500 mm
Special constructions up to a height of 6,000 mm

HOLLER PRO Swing Gate Classic

Width: max. 12,000 mm, single leaf
Height: max. 2,500 mm
Special constructions up to a height of 5,000 mm

HOLLER PRO Sliding Gate on sloping ground

Width: max. 25,000 mm cantilever
Height: max. 2,500 mm
Sliding gates on sloping ground up to 8%
Special constructions up to a height of 5,000 mm

HOLLER PRO Telescopic Sliding Gate

Width: max. 25,000 mm, cantilever
Height: max. 2,500 mm
Special constructions up to a height of 5,000 mm

HOLLER PRO Bi-folding Speed Gate Quattro Premium

Width: max. 10,000 mm
Height: max. 5,000 mm
Also available as single leaf gate.

HOLLER PRO Bi-folding Speed Gate Quattro ECO

Width: max. 8,000 mm
Height: max. 3,000 mm
Also available as single leaf gate.

HOLLER PRO Extra++

Custom-made
Foil print, milled, laser-cut, and much more ...

HOLLER PRO Sliding Gate Galaxy Gate

Sliding gate with rounded corners, specially nippled perforated sheet with logo, straight bracing and integrated LED lighting

HOLLER PRO Barrier 60+

Barrier length max. 6,000 mm with LED beam illumination

HOLLER PRO Pedestrian Gate Classic

Width: max. 1,500 mm
Height: max. 2,500 mm
Special constructions up to a height of 5,000 mm

Airports

Perimeter protection at airports is achieved by a combination of mechanical and sensory components. These include conventional external protection or innovative, certified barriers at external access and parking areas, efficient vehicle gates equipped with bi-folding speed gates or combinations of barriers and sliding gates.

HOLLER PRO
Sliding Gate Classic, cantilever
Width: max. 25 m
Height: max. 5 m

Here: *sliding gate with bar infill including finger protection*
Width: 25 m, height: 2 m
Finish: RAL 9010 - pure white
Drive system: HOLLER Inline 250
Pedestrian gate including finger protection

HOLLER PRO
Barrier 60+
Max. barrier length 6 m

Here: *barrier, automatic operation*
Barrier length: 4.5 m incl.
LED beam illumination

Height: 2 m
Finish: RAL 7016 - anthracite grey

HOLLER PRO
Telescopic Sliding Gate
Width: max. 25 m
Height: max. 5 m

Here: *telescopic sliding gate, 3-fold with bar infill*
Width: 14 m, height: 2.5 m
Finish: RAL 6005 - moss green Drive system: Inline 250 T

HOLLER PRO
Bi-folding Speed Gate Quattro Premium
Width: max. 10 m
Height: max. 5 m

Here: *bi-folding speed gate, 2-leaf, automatic operation*
with tight double welded mesh infill
Width: 7 m, height: 4 m
Finish: RAL 7040 - window grey

Industry

No two industrial sites are alike and each requires its own security solution. Unauthorised access to the company premises is prevented, access is regulated and boundaries are defined. We offer the most suitable gate and fence solution. Adecuate perimeter protection prevents loss from inventory shrinkage and property damage, and reduces security staff costs by effectively controlling pedestrian and vehicle access - when 24-hour surveillance is not required.

HOLLER PRO
Barrier 60+
Max. barrier length: 6 m
Here: *barrier, automatic operation*
Barrier length: 5 m including tip support and LED beam illumination
Finish: RAL 7040 - window grey
Finish beam: white with red safety strip

HOLLER PRO
Bi-folding Speed Gate Quattro Premium
Width: max. 10 m
Height: max. 5 m

Here: *bi-folding speed gate, 2-leaf, automatic operation with bar infill*
Width: 4 m, height: 5 m
Finish: RAL 7040 - window grey

Finish: RAL 7016 anthracite

Individuality

Design

Round or square shapes, style and modern materials such as corten steel and glass: Gates with character are real eye-catchers. Our engineering team manages the technical implementation of all customer-specific requirements. Exquisite accessories such illumination with LED lighting and individual logos transform each gate into a unique masterpiece.

Security and Safety

All systems are manufactured in accordance with the latest CE mark requirements and the product standard for powered doors and gates EN 13241-1. Our automatic sets include all required safety devices. In particularly sensitive areas, additional accessories are available, such as the HOLLER PRO Safety Plus, a non-pressure sensitive safety contact edge that detects any potential obstructions early before a collision.

Functionality

Our product range includes numerous modern and "smart" solutions such as position controls, home automation and operation with mobile phones via GSM. We also provide "classic" solutions such as remote control, key switch and combination locks.

Established in 1992, we have been manufacturing high-quality aluminium gates and fences at our Leitring plant in Austria for 30 years.

Curiosity and passionate enthusiasm for technology are our motor and motivation. Our engineering team is focused on the development of innovative solutions but also works on the optimization of existing products to potentially improve them. We trust in traditional craftsmanship and the most advanced technology to deliver tailor-made solutions for a broad product portfolio.

Our highly qualified team accompanies every project from consulting, planning and technical clarification to shipping. We are on hand even after project completion to provide comprehensive support and service.
